ISOVER'S FREE PALLET REPATRIATION SERVICE NOW AVAILABLE

To further support our 3 Point Plan for environmental sustainability, Isovover's free pallet recovery service is now available to our customers to allow removal of Isovover pallets in an environmentally responsible way.

European Logistics Management Ltd (ELM) have been providing reverse logistics solutions for returnable transit packaging (RTP) in many industries since 1991. ELM will collect Isovover pallets from branch locations at no cost to the customer in order to further reinforce our plan to use less materials, less energy and create less emissions. In turn this will:

- Facilitate re-use of pallets
- Reduce packaging waste
- Eliminate the use of single trip pallets
- Promote the use of better quality pallets
