## Isover Launches New Build Residential Solutions Guide

6 May 2011

- ★ Less Materials
- ★ Less Energy
- ★ Less Emissions

Isover, the leading developer of sustainable insulation solutions designed to protect both the natural and the built environment, has launched its first New Build Residential Solutions Guide, which is available to download from its website [www.isover.co.uk](http://www.isover.co.uk).

Designed to provide the construction industry with a 'one-stop' guide to all of Isover's solutions for the residential sector, this comprehensive and easy to navigate resource includes solutions for internal and external walls, room-in-the-roof and cold roof constructions, separating walls and floors, and internal floors. It also gives clear information on how to comply with different regulatory requirements, including the Code for Sustainable Homes and thermal and acoustic Building Regulations.

Stacey Davis, marketing director of Saint-Gobain Isover commented: "Our New Build Solutions Guide is a great addition to the resources we offer and will assist house builders in meeting legislation and addressing the fundamental challenges facing the industry in terms of energy and environment."

For more information please visit the website or follow @IsoverUK on Twitter.

Your environment. It's the nature of our business.

**Note to Editors**

Isover products provide the highest performing energy efficiency and acoustic insulation solutions that are safe to use and that help protect the environment. Over a typical 50 year lifespan of a building Isover insulation will save 300 tonnes of CO<sub>2</sub>, which equates to over 375 times more CO<sub>2</sub> than is needed for its manufacture.

Isover insulation warms and protects one in three European and one in five American homes. The company is committed to ongoing R&D to deliver technical excellence and global leadership in glass mineral wool insulation. It is also part of the Saint-Gobain Group, a worldwide leader in the design, manufacture and distribution of building materials for the construction market.
